To Whom It May Concern:

I have been working with Mechanical Associates as a representative in the Pacific Northwest. We supply Mechanical Associates gates for many of our projects. Each project requires custom fabrication and close coordination between our company and Mechanical Associates. They are always willing to help us match the right product for the right application.

Pedroni & Co. LLC is more than happy to work with Mechanical Associates because of their customer focus and reliability. Mechanical Associates responds in a timely manner to the needs of our customers. They always produce a high quality product that is delivered on time to our customers. Their entire staff is dedicated to making the best possible gates on the market.

If you have any questions or concerns, please feel free to call me or email.

Sincerely

Victor Pedroni  
President
